## **AngioDynamics Awarded Novation Innovative Technology Contract Covering BioFlo PICCs and BioFlo Ports**

ALBANY, N.Y., July 21, 2014 (GLOBE NEWSWIRE) -- AngioDynamics (Nasdaq:ANGO), a leading provider of innovative, minimally invasive medical devices for vascular access, surgery, peripheral vascular disease and oncology, announced today receipt of an Innovative Technology Contract for the Company's BioFlo PICC and BioFlo Port products from Novation, the leading health care supply chain expertise, analytics and contracting company.

Novation serves the more than 100,000 members and affiliates of VHA Inc., UHC, Children's Hospital Association and Provista. In 2013, health care organizations purchased \$49 billion of products and services through Novation contracts. This represents 40 percent of the staffed beds in the U.S., 45 percent of U.S. admissions, 47 percent of the nation's total surgeries and 94 percent of academic medical centers.

"This is the first Novation contract covering both PICCs and Ports in AngioDynamics' history, and it is a testament to our BioFlo technology, as well as the value the Navilyst transaction has brought to the Company," said Joseph M. DeVivo, AngioDynamics' President and Chief Executive Officer. "We are pleased to introduce this new technology to the hospital providers that Novation serves as they look to improve patient outcomes and reduce healthcare costs. We believe this Innovative Technology Contract provides further market validation that BioFlo is truly a differentiated technology with unique benefits. Unlike other thromboresistant products, the technology behind our disruptive BioFlo devices is designed to be both present throughout the entire catheter and permanent, leading to decreased accumulation of catheter-related thrombus without incorporation of heparin, antibiotics or antimicrobials, or any other transient materials typically associated with coated or impregnated technologies."

Novation's Innovative Technology program seeks to identify and contract for innovative medical products used in the clinical care of patients that offer an incremental benefit to patient care, or patient or health care worker safety. The process includes review by a clinical member council or task force to determine whether the technology represents an incremental advantage for providers. BioFlo products are manufactured with Endexo technology, a permanent and non-eluting integral polymer, designed to provide more resistance to the accumulation of platelets and thrombus for the life of the catheter.<sup>1</sup> This Innovative Technology Contract will have the "anti-thrombogenic" contract number MS2930.

"We feel the vascular access products in our BioFlo platform feature the most advanced thromboresistant technology available today, representing our commitment to bringing technologies to market that enhance our customers' clinical and economic value," said Chuck Greiner, Senior Vice President of AngioDynamics' Global Vascular Access Franchise. "Being selected by Novation for our BioFlo PICC and BioFlo Port products is an affirmation of that belief."

<sup>1</sup>The resistance to thrombus accumulation was evaluated using in-vitro and in-vivo models. Pre-clinical in-vitro and in-vivo evaluations do not necessarily predict clinical performance with respect to thrombus formation.

### **About AngioDynamics**

AngioDynamics Inc. is a leading provider of innovative, minimally invasive medical devices used by professional healthcare providers for vascular access, surgery, peripheral vascular disease and oncology. AngioDynamics' diverse product lines include market-leading ablation systems, fluid management systems, vascular access products, angiographic products and accessories, angioplasty products, drainage products, thrombolytic products and venous products. ### **About Novation, Winner of the Ethics Inside® Certification**

Founded in 1998, Novation is the leading health care supply chain expertise, analytics and contracting company for the more than 100,000 members and affiliates of VHA Inc. and UHC, two national health care alliances, Children's Hospital Association, an alliance of the nation's leading pediatric facilities, and Provista, LLC. Novation provides alliance members with sourcing services, as well as information and data services. Based in Irving, Texas, Novation develops and manages competitive contracts with more than 800 suppliers. Members of VHA, UHC, Children's Hospital Association and Provista used Novation contracts to purchase approximately \$49 billion in 2013. Novation has earned the coveted Ethics Inside® Certification from Ethisphere Institute, a leading international think tank dedicated to the research and promotion of best practices in corporate ethics and compliance. Novation was also named on Ethisphere's World's Most Ethical Companies list and is the only company in the health care industry to earn both distinctions for three consecutive years.
